Dear Jackson Electric Members,

Would you please take the action I have indicated below:

- Option 1. I don't own this land, but to the best of my knowledge, the landowner is: _____ who's address is: _____.
- Option 2. I do own this land, and I hereby authorize you to retire the service at location _____ as I have no further use of it. *I understand retiring the service may very well include removal of transformer, meter loop, pole, wire, etc. I also understand per JEC Rules & Regs, once a service is retired (abandoned) and the same property owner later desires service to be restored at the same or similar location, they must pay 100% of the new construction costs, in advance.*
- Option3. I do own this land, and I hereby authorize you to disconnect the meter. I want to retain the service at location _____ for future use. I am aware there will be an "Idle Rate" of \$20 per month billed to me and a \$50 reconnection charge once the meter is reconnected.

Signed: _____ Date _____
